

YOUR WEB ADDRESS, AND A SIMPLE MOVE.

Where fishbonegraphics.com lives today, and the one small move that gets it ready for the new site. One web address, one place for the tools, neonburro on call for anything technical. Nothing changes until you say so.

WHAT WE FOUND

BUSINESS	Fishbone, Inc., Colorado, since May 2000, in good standing
DOMAIN	fishbonegraphics.com at GoDaddy, registered in 2001, renews August 2027
NAMESERVERS	GoDaddy. This is the part that points the name at a website
WEBSITE	WordPress with the YooTheme builder, hosted at Scala Hosting
EMAIL	Microsoft 365. Stays exactly as it is, we work around it

WHY CLOUDFLARE

It is where the web is heading: fast, secure, and built for the next few years of agents, smart marketing and what we call marketing engineering. It is what we build on. Moving the name itself is optional and not urgent. If you ever want to, registration is about \$10 a year, roughly half of GoDaddy, and it does not come up until August 2027. Cloudflare helps with that move and so do we.

THE MOVE, IN THREE STEPS

01 A CLOUDFLARE ACCOUNT, IN YOUR NAME

Five minutes at cloudflare.com. It is yours, you hold the keys, we get a seat so we can help.

02 ADD FISHBONEGRAPHICS.COM TO IT

Cloudflare copies your current records on its own. We double check the email ones so Microsoft 365 keeps working, and fix a small spam setting while we are in there. Your domain still says GoDaddy sends your mail, and Microsoft does.

03 PASTE TWO LINES AT GODADDY

Cloudflare gives you two nameserver addresses, they go in the GoDaddy domain settings. That is the whole move. The old site and your email keep running, and the new site goes live when you tell us.

HAPPY TO DO IT FOR YOU

Twenty minutes on the phone, or add tyler@neonburro.com as a delegate on your GoDaddy account and we do it start to finish. The domain stays in your name.

THEN EVERYTHING IS IN ONE PLACE

The site, the back room, the emails, the forms, the inventory, the marketing. Custom built around the shop, not a template, and we keep building whatever the shop needs next.
