

YOUR WEB ADDRESS, AND A SIMPLE MOVE.

Everything we could see from outside about where fishbonegraphics.com lives today, and the one small move that gets it ready for the new site. Nothing here changes until you say so.

WHAT WE FOUND

BUSINESS	Fishbone, Inc., Colorado, since May 2000, in good standing
DOMAIN	fishbonegraphics.com at GoDaddy, registered in 2001, renews August 2027
NAMESERVERS	GoDaddy. This is the part that points the name at a website
WEBSITE	WordPress with the YooTheme builder, hosted at Scala Hosting
EMAIL	Microsoft 365. Stays exactly as it is

ONE THING WORTH FIXING ANYWAY

Your domain still tells the world that GoDaddy sends your email, but Microsoft does. Some mail from the shop is probably landing in spam folders because of it. It is a one line fix and it comes free with the move below.

WHAT STOPS COSTING MONEY AFTER LAUNCH

The Scala hosting plan, the YooTheme license and the two plugins. The domain and Microsoft 365 stay.

THE MOVE, IN THREE STEPS

01 A FREE CLOUDFLARE ACCOUNT, IN YOUR NAME

Five minutes at cloudflare.com. Cloudflare hosts the name for free and it is what we recommend. It is yours, you hold the keys, we get a seat so we can help.

02 ADD FISHBONEGRAPHICS.COM TO IT

Cloudflare copies your current records on its own. We double check the email ones so Microsoft 365 keeps working, and we fix the spam line while we are in there.

03 PASTE TWO LINES AT GODADDY

Cloudflare gives you two nameserver addresses. They go in the GoDaddy domain settings. That is the whole move. The old site and your email keep running, and the new site goes live when you tell us.

HAPPY TO DO IT FOR YOU

If you would rather not click through any of it, we can. Twenty minutes on the phone, or add tyler@neonburro.com as a delegate on your GoDaddy account and we do it start to finish. The domain stays in your name.
